SAP Implementation Project

1. **Project Preparation:** Defining the project scope, setting objectives, assembling the implementation team, and outlining a high-level plan.
2. **Business Blueprinting:** Conduct detailed workshops with business stakeholders to map current processes, identify pain points, and define the desired "to-be" state in SAP. This creates the blueprint for the SAP system design.
3. **Realization:** The technical configuration of the SAP FICO module takes place. This includes customizing settings, building interfaces, and developing necessary reports or enhancements.
4. **Final Preparation:** In this phase, data migration, rigorous testing (unit testing, integration testing, user acceptance testing), and comprehensive end-user training occur.
5. **Go-Live and Support:** The new SAP FICO system goes into production, and the focus shifts to post-implementation support, issue resolution, and providing ongoing assistance to users
