## Projects

---

### SAP AMS Support Project

*Role: Senior Analyst (SAP PP)*

- Worked on a high-profile AMS Support project for a multinational automotive and appliance corporation focusing on the APAC region.
- Analyzed business workflows and participated in project workshops.
- Interacted with clients for data gathering and requirement analysis.
- Managed Master Data —Material Master, BOM, Workcenter, Routing, and Production version.
- Rearrange the Schedule and add Ad-Hoc Background Jobs
- Configured SAP components, including modifications to the Production Supervisor, Factory Calendars, MRP Controllers, and Order Types.
- Created change requests and conducted end-user training sessions.
- Resolved issues related to the Production order cycle.
- Utilized the ServiceNow ticketing tool for incident and service request management.

### SAP End to End Rollout Project

*Role: Senior Analyst (SAP PP)*

- Analyzed business workflows and actively participated in project workshops.
- Gained a comprehensive understanding of various functional areas in SAP and their integrations.
- Configured key SAP components, MRP controllers, order types, and production scheduling profiles.
- Managed master data efficiently using LSMW.
- Performed Functional Unit Testing (FUT) and System Integration Testing (SIT).
- Tracked and resolved defects during UAT.
- Prepared and shared daily status reports throughout the UAT phase.
- Delivered support during the go-live phase.
