Profile Summary — Enthusiastic and results-driven **SAP PP/QM Functional Consultant** with 2 years of experience in implementing and optimizing SAP solutions. Proven ability to collaborate with cross-functional teams to translate complex business requirements into customized, effective solutions. Seeking to leverage skills and expertise to drive performance improvements in a challenging, growth-focused environment.

Skills

- SAP QM Configuration
- Plant Configuration
- Master Data Management
- Production Order Management
- System Testing and Validation
- SAP Integration Testing (PP-QM)
- SAP Debugging and Root Cause Analysis

Experience

JIO PLATFORMS LIMITED

Dec 2022 – Present

Assistant Manager- SAP PP/QM Functional Consultant

Key Responsibilities-

- Spearheaded roll-out projects at new plants, including QM module configuration, activation, and plant-specific configurations.
- Conducted end-user training, managed master/transactional data, and resolved post-go-live user issues, delivering hyper-care support.
- Developed comprehensive AS-IS and TO-BE documentation for future business process alignment.
- Prepared detailed functional specifications for custom requirements and system enhancements.

Support Activities –

- Troubleshoot and resolved production issues, ensuring minimal downtime and seamless operations.
- Collaborated with end and core users to gather inputs for new requirements or modifications in existing business processes.
- Managed issue resolution for SAP PP and QM modules to support continuous operational efficiency.

Area of Exposure

SAP QUALITY MANAGEMENT

- Configured QM Master Data, including plant settings, selected sets, and inspection types.
- Proficient in maintaining master data: Material Master, Master Inspection Characteristics, Inspection Methods, Inspection Plans, and Sampling Procedures.
- Established QM catalogs, code groups, and selected sets for effective quality control.
- Experienced in defect recording, usage decisions, and stock postings within the QM module.

SAP PRODUCTION PLANNING

- Expertise in PP-PI Masters, including Material Master, Bill of Materials (BOM), Work Centers, Routings, Resources, and Production Versions.
- Managed production and process orders: creation, material availability checks, order release, confirmation, TeCo (Technical Completion), and order closure.
- Skilled in inventory management: goods issue to production/process orders and goods receipt from production/process orders.
- Implemented planning strategies for various manufacturing approaches, including Make-to-Stock, Make-to-Order, Discrete Manufacturing, Repetitive Manufacturing, and Process Industries.
